## IT Consulting & Projects

### 01. Software Consulting

Cloud-Park Software Consulting strives to optimize the ROI of your software development program, by efficient planning, implementation and management of new software development initiatives, as well as reorganize any existing projects to its maximum performance.

Cloud-Park Software Consulting offers a blend of technology knowledge, data mining and analytical tools to help you create and transform applications, processes and operations in line with your unique possibilities. Our strategic software consulting services will help you automate and digitalize operations, optimize the software portfolio, and implement the latest technologies with the help of our industry experts from different knowledge domains.

### 02. Project Management

Cloud-Park assists companies in the timely and streamlined delivery of their IT programs. From Project Managers, Architects, Systems/Business Analysts, and Developers, our highly qualified experts are here to provide you with the necessary skill sets and methods to support a smooth project delivery and to ensure that the undertaken project is completed on time and within budget.

### 03. Cybersecurity Consulting

Cloud-Park Cybersecurity Consultancy helps companies to construct their plan for digital risk and cyber protection and to identify a measurable roadmap for the implementation of suggested mitigation techniques. Cyber security services from the Cloud Park help organizations develop a cyber protection assurance feature to allow continuous monitoring of controls and coordinate follow-up audits to ensure that the security posture has been strengthened by the risk reduction techniques implemented. We allow organizations to comply with data privacy regulations such as the General Data Protection Regulation (GDPR), Privacy Shield, etc, with advanced AI and automation tools.

### 04. Web & Mobile Application Development

We offers you the latest available technologies with the most competent innovative designs and coding strategies, built over platforms that create the base of the best user friendly environment, yet a very complex system may be running in the background. The team that we hire is carefully filtered to pull out the most passionate ones from the lot. We believe that passion at work is the only drive that brings growth in an organization.

# PROFESSIONAL SERVICES

## IT Staffing

### Staff Augmentation & Outsourcing Services

Cloud-Park offers the following Staff Augmentation services for your organization's imminent needs:

- Contract Staffing
- Contract to Hire
- Temporary Staffing
- Project Staffing
- Dedicated Staffing

Cloud-Park provides qualified and experienced candidates to suit your specific and timely requirements. Our exclusive manpower-support extends to both your on-site and our offshore offices locations alike. We facilitate you to accomplish your special or seasonal projects without having to hire permanent staff eliminating any additional HR related expenses/liabilities. Providing expert personnel in technology platforms, Cyber Security, software development, QA and testing, databases and networking, our extensive database of candidates allows us to identify proven performers who can step in and make an immediate contribution to the growth and productivity goals of your organization.

# MANAGED IT SERVICES

## Intelligent Service desk & Endpoint Management

Cloud-Park transforms the traditional service desk into an intelligent support model that delivers a user-centric experience aligned with the digital workplace. Our Workplace Services, enable organizations to transform end-user collaboration platforms, services and productivity solutions into a modern, cloud-based, mobility-enabled digital workplace that fosters innovation and productivity, while reducing IT costs.

Cloud-Park Endpoint Management Services provision, track, image, secure, deploy, and manage all endpoints and applications in an environment, whether traditional PC, virtual, or mobile. This enables your organization to take advantage of emerging technologies while minimizing management time, while also giving digital workers a fast, reliable, and secure experience.

# MANAGED IT SERVICES

## Infrastructure Management Services

We offer two core levels of Managed Services:

- Maintaining existing infrastructure with basic service monitoring
- Managing discrete and distinct tasks, from service desk, administration and remote monitoring, to full network and server infrastructure management.

### Type of Services:

#### Managed Network & Security Services

Cloud-Park Network & Security Device Management Solutions are designed to help organization manage and optimize your Network & security technology infrastructure.

#### Managed Datacenter Services

Our Datacenter Managed Services ranging from Infrastructure Management (Cross platform Server/Network/Storage management and Support in virtual and physical environments) to Remote Centralized monitoring of the Datacenter.

#### Cloud Infrastructure Management

Cloud infrastructure services include designing, deploying, monitoring, supporting, and optimizing your cloud or hybrid IT infrastructure. With dedicated services, Cloud-Park ensures high performance, availability and scalability of your cloud infrastructure.

# CLOUD HOSTING

## Hosted Services

### Cloud Server

Cloud servers are virtual instances offering high degree of flexibility and availability. There is no resource limitation of the underlying architecture and for this reason cloud servers can be easily scaled without loss of performance. Together with root access, each customer can use their own cloud server infrastructure according to their needs.

### Dedicated Server

The dedicated root solution, in which we operate a hardware server for you in one of our data centres and equip it with additional hard drives if required. You get maximum performance for your applications and you are completely independent with root access.

## Managed Cloud Infrastructure

### Managed Cluster

Cluster systems are groups of servers and other components that act like a single system and are characterized by high availability, enormous stability and unlimited flexibility. Our Hyperconverged infrastructure ensures distribution of the individual compute components to different data centre guaranteeing service availability thus reducing risk to a very minimum.

Our Hyperconverged infrastructure ensures distribution of the individual compute components to different data centre guaranteeing service availability thus reducing risk to a very minimum.

# CLOUD HOSTING

## Cloud Augmented Workspace

With our Hyperconverged Network, we deliver and manage the ICT infrastructure for Small Business, Hospitality, Medical & Educational Institutions hosted in Swiss Datacentre. The customer have the flexibility to choose from dedicated or shared Cloud infrastructure as per requirement.

## Cloud Consulting

### Software Defined Infra (SDI)

Our Cloud Architects, design, deliver and deploy various SDI solutions

- SDN: Software Defined Network- Client Access LAN
- SDDC: Software Defined Datacentre- Virtualized Datacentre & Micro Datacentre
- SDWAN: Multisite Connectivity over Internet.

### Hyperconverged Infra (HCI)

vSAN or virtualSAN Consultation and Deployment. Eliminating a very critical module like storage from network reduce critical data loss in the event of storage failure.

## ABOUT US

Cloud-Park is a Swiss ICT service provider for medium-sized companies and primarily operates in the service, finance, healthcare, industrial, public and govt sectors. As your trusted partner, we offer you holistic ICT services with innovative and tailor-made quality solutions without compromise. Our team implement and operate your ICT processes, infrastructures and applications so that you can concentrate on your core competencies.

In addition, we work with you to develop solutions that advance your digitization process offering a competitive edge. Our focus is on hybrid cloud solutions, staff augmentation and outsourcing, application development, ICT project management, SOC/ SIEM, NOC, dedicated industry solutions and consulting services with core competencies on ICT training, ICT infrastructure, ICT security & Datacenter Services.

### Nextgen ICT Experience

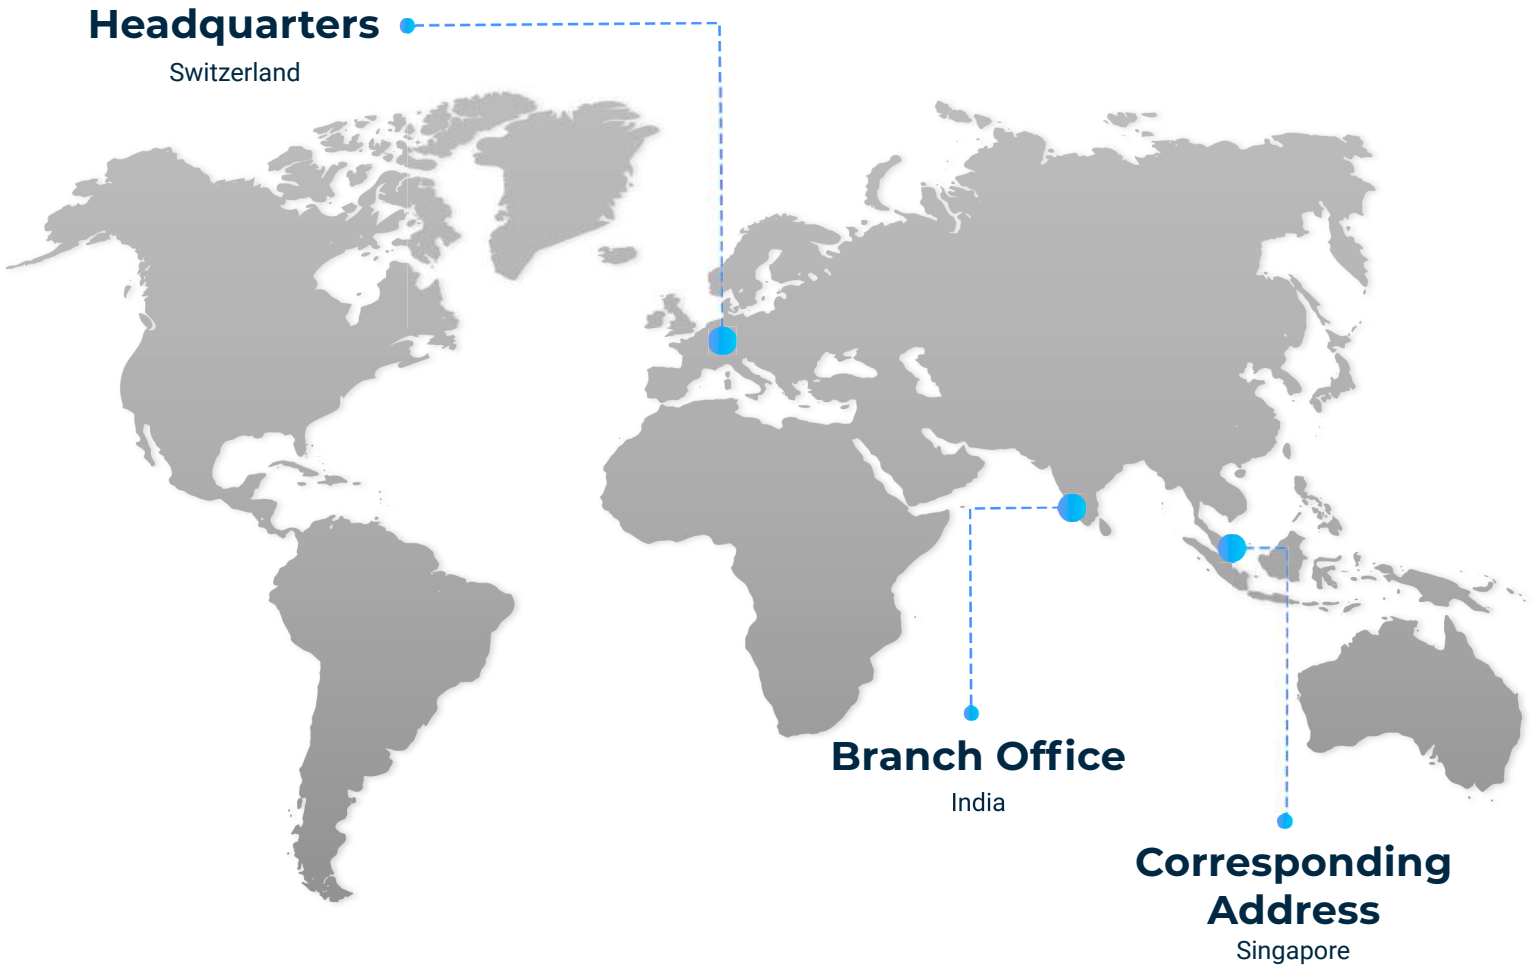

By combining our own infrastructure with cloud technologies and tools for modern collaboration, we lay the foundation for your digital success. Taking into account the aspects of people, the environment and technology, we create great experiences. To achieve this, the right course must be set at an early stage on the way to the digital future. In addition to the choice of the appropriate operating model, topics such as governance, identity, information and security management are also important prerequisites for the successful implementation of a cloud-based deployments.

In order to successfully meet constant change, not only the corporate culture but also the ideas of employees and management play a major role. These aspects need to be addressed in the context of change management. This is the only way to create great experiences for employees. Together we achieve effective and measurable results with our standardized approach within a short time. Continuous further development ensures sustainable digital solution.
